Gorilla Air Disc Brakes
#GBADP1369

\$ 119.95 ea.

Gorilla Brake & Components Non Asbestos Air Disc Pads are manufactured with integrated **World Class Friction Technologies** with all critical raw materials sourced from suppliers in Europe and North America. Our pads are closely developed with the industry's leading brake manufacturers and engineered to meet or exceed the exacting standards of the OEM.

Consistent compressibility over the entire pad reduces noise and vibration and helps in outperforming leading competitors in stopping distance and resistance to fade and wear.

- Pads are FMVSS121 Compliant.
- Pads meet SAE J2975 CA/WA copper regulations.
- Mechanical lock and multi-layer sub-structure eliminates delamination and separation.
- Pads meet ECE 90 regulations.
- GBC hardware exceeds OEM shear specifications.
- Cast backing plate for greater strength and corrosion resistance
- Lighter than steel.

Gorilla Brake ADB Pad Cross-Reference

PAD FEATURES

1. OE PERFORMANCE FRICTION MATERIAL
2. THERMAL UNDER LAYER
3. HIGH TEMPERATURE ADHESIVE
4. MECHANICAL ANCHORING BACKPLATE (9mm Thickness)

GORILLA BRAKE PREMIUM DUTY 28K:

For premium duty Over The Road 23k to severe duty applications like refuse, cement haulers, and motor coaches, you need formulations that can withstand extreme torque and temperatures. Gorilla Brake Premium Duty is formulated with high thermal fibers and modified cross-linking resins so they can endure the rigors of severe duty.
